

# Mobile Clinic with Amazing Charts EHR Reduces Chronic Disease in Underserved Population

Dr. Lopez wants to help fix the broken healthcare system in America

## Challenge: Bringing affordable healthcare to the streets of L.A.

Going mobile without the internet	▶ <i>"I couldn't use a web-based system because the mobile clinic doesn't always have broadband reception. The software had to run on a simple laptop computer. . ."</i>
Keeping cost down	▶ <i>"It had to be inexpensive because I needed to spend most of my budget on equipping the clinic."</i>
Finding an intuitive EHR	▶ <i>"I wanted an intuitive EHR I could start using immediately without any formal training."</i>

## Solution: Amazing Charts EHR

Easy to learn	▶ <i>"After watching someone use Amazing Charts to document a few patient encounters, I was able to use it to see a patient the next day."</i>
Risk Free	▶ <i>"I was able to use a full-working version of the EHR software before purchasing."</i>
Affordable	▶ <i>"The very affordable price and user-friendliness of Amazing Charts enables me to provide low-cost medical services to people in desperate need of care."</i>

## Results

- ✓ The affordability of Amazing Charts left enough money for Dr. Lopez to purchase a 34-foot "fifth-wheel" trailer
- ✓ Customizable health maintenance alerts allow Dr. Lopez to easily track and treat chronic diseases
- ✓ The granular reports allow Dr. Lopez's funders to see how many people he is treating and with what conditions
