

Nurse Practitioner Runs Solo Practice With Amazing Charts EHR

FNP Mary Oot was able to start her own medical clinic thanks to Amazing Charts

Challenge: Choosing the right EHR to start a solo practice

Needed a low start-up cost	▶ <i>"I knew getting my practice started was going to be expensive, so I needed to find an EHR that was affordable."</i>
Ineligible for MU incentives	▶ <i>"I needed an EHR system with low operating and maintenance costs because NPs like me are ineligible to receive Meaningful Use incentives."</i>
Required user-friendly software	▶ <i>"I was starting this practice alone, so I needed an EHR that was user-friendly."</i>

Solution: Amazing Charts EHR

Great references	▶ <i>"I spent months researching many EHRs, but read several positive reviews on Amazing Charts and decided to try it."</i>
Responsive support	▶ <i>"Customer support was a tremendous help in getting us started and is very responsive. I would not be as efficient without them."</i>
Seamless integration	▶ <i>"Amazing Charts and Updox Document Management work extremely well together. I would strongly recommend Updox as a companion program."</i>
Clinician-friendly	▶ <i>"Amazing Charts is a very user-friendly program. I can write notes and document visits much quicker than I could with paper."</i>

Results

- ✓ FNP Mary Oot loves how easy Amazing Charts is to use
- ✓ Enjoys running her own practice where patients remain the priority
- ✓ The practice is operating at maximum efficiency with Amazing Charts
