

UNIFIED COMMUNICATIONS

HIPAA-Compliant Updox eFax

The easy, HIPAA-compliant way to share and manage documents

With eFax, digital documents flow through our secure, HIPAA-compliant inbox, increasing your staff and practice productivity while optimizing your workflow in a safe and efficient way.

All of your documents are organized in one easily accessible place, protected from any potential security breaches. From patient records to insurance claims, everything can be securely transmitted in a matter of seconds.

Benefits of eFax

Centralized Organization

Send, receive, and manage all documents through a single, organized inbox.

Access Anywhere

Be productive on your schedule by working from anywhere, anytime.

Go Paperless

Commit to a paperless practice and save money on paper-based workflows. No more ink, toner, or shredding!

Print to Fax Functionality

Quickly send pages from any EHR.

Improved Workflows

Digitally sign documents, edit text, add comments, and eliminate fax congestion to streamline processes.

Utilize Advanced Fax Routing

Build rules to automatically route incoming faxes to the right person or care team, enhancing triage workflows.

Outbound Fax dashboard

Monitor and track a complete day's worth of faxes seamlessly.

Simplify your document management and enhance your practice's productivity with Updox's HIPAA-compliant eFax solution.

Here's how eFax works in the patient journey

Pre-Visit

Visit

Post Visit

Ongoing Care

Pre-Visit

- Securely share documents and be fully prepared to meet with patients
- Dramatically reduce paper and ink usage at your practice
- Save money and stay better organized
- Receive inbound patient referrals and effectively route them to the appropriate staff for scheduling

Post Visit

- Fax out visit notes, outbound referrals, or orders after a visit

Ongoing Care

- Improve organization with digital workflow
- Easily share new information and communicate more efficiently
- Respond to record requests with ease
