

HIPAA Compliant eFax

An easier way to manage documents

Updox Electronic Fax provides you constant availability to send and receive documents from any location or device—removing the expenses of physical hardware and more. With no apps to download, Electronic Fax is ideal for increasing your staff and office productivity and optimizing your document workflow, in a safe and efficient way. Documents flow through our secure, HIPAA-compliant inbox and stops the endless trips back and forth to the fax machine machine as well as the extra time and money associated with physical documents.

1,200
pieces of paper are
used each month
per-provider, costing
those practices up to
\$2,400

Save Time

New Advanced Fax Routing automatically organizes and assigns ownership or prioritizes faxes to keep documents moving throughout the day

Improved Security

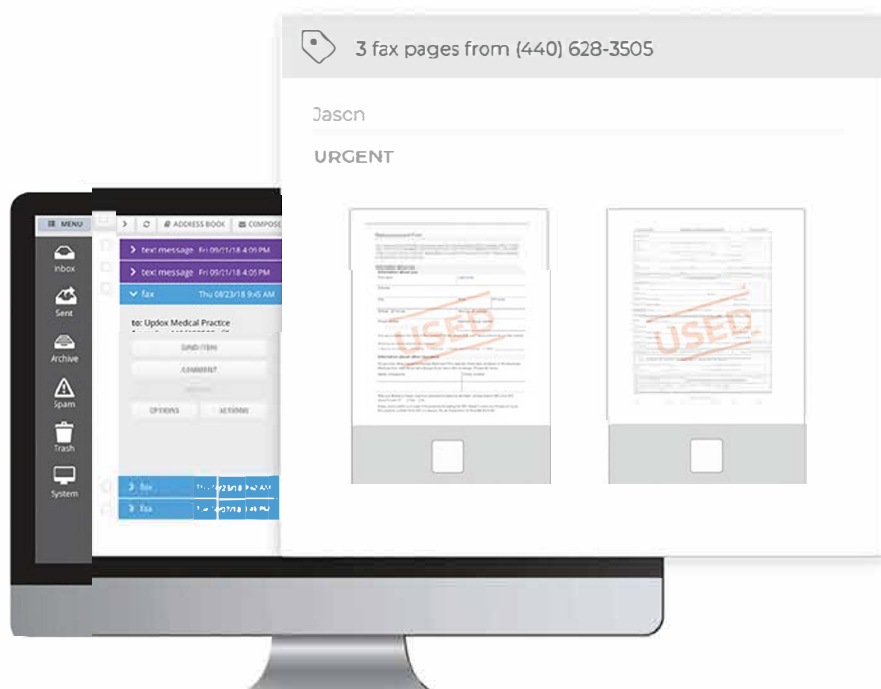

Route information coming from sensitive sources to private queues

Faster Turnarounds

With no time spent tagging, your staff can save 4 hours per week, on average

Better Patient Care

Send important documents such as prescription renewals and lab results to the right people faster

"Updox is bringing about a revolutionary change in medicine. With everything all in the same system, it's all so easy and integrated. Updox solutions tie in well together and are packaged all within the Inbox. It makes it very efficient to use. Sometimes, we forget how to practice medicine. With Updox – we can do things logically and bend to patients' needs."

— James Legan, MD
