

CY 2025 Real World Testing Report for AmazingCharts

Executive Summary

This is the test report for CY 2025 real world testing for AmazingCharts certified EHR solution. This is the companion document to our CY 2025 real world test plan that described our approach for conducting real world testing in CY 2025 and the testing measures we employed.

Our findings show that EHR is working in our production as it was certified. Following the ASTP/ONC enforcement discretion guidance, we are only reporting on our FHIR and API measure, which was measure #9 from our test plan. We elected to not report the other measures to devote more time to completing the HTI-1 certification updates. We appreciate the government's efforts to reduce regulatory burden.

Our signed attestation of compliance with the real world testing requirements is on the following page.

Developer Attestation

This Real World Testing report is complete with all required elements, including measures that address all certification criteria and care settings. All information in this plan is up to date and fully addresses the health IT developer's Real World Testing requirements.

Timeline and Milestones for Real World Testing CY 2025

- Milestone 1Q-2025: 1Q-2025: Health IT system is fully enabled for use in real world testing.
 - STATUS: MET
- Milestone 3Q 2025. Begin making plans to collect data for RWT measures. If necessary, engage clients to ask for their support and participation in real world testing.
 - STATUS: MET
- Milestone 4Q-2025. During the last quarter of the year, the CY 2025 real world test reporting will be completed according to ONC and ONC-ACB requirements and expectations.
 - STATUS: MET
- Milestone 1Q-2026. Submit RWT Test Report to ONC-ACB.
 - STATUS: MET

Standards Version Advancement Process (SVAP) Updates

For CY 2025 RWT testing, we did not do any SVAP updates but used the current standards required in the certification criteria.

Standard (and version)	All standards versions are those specified in certification criteria.
Date of ONC-ACB notification (SVAP or USCDI)	N/A
Date of customer notification (SVAP only)	N/A
USCDI-updated certification criteria (and USCDI version)	The plan documents the support of all USCDI v1 data elements.

RWT Measure #9. Number of applications/3rd party systems using API capabilities

Associated Criteria: 315(g)(7), (g)(9)-(g)(10)

Testing Methodology: Reporting/Logging and Survey/Self-Test

Measurement Description

This measure will determine how many 3rd party systems or applications are integrated and using the EHR's FHIR API interface. This measure will allow us to verify our certified API is working with 3rd party applications to access USCDI patient data.

Care Settings

We designed this measure to test the family practice, internal medicine, and pediatrics practices that we support and target.

Testing Results

Testing Metric/Measurement: Number of 3rd party applications using FHIR API with EHR

Result: 3 API applications

Analysis and Key Findings

Currently, we have three (3) FHIR clients connected in our staging environment, including the eCR FHIR Now App for electronic case reporting.

Non-Conformities or Errors Discovered

During our testing, we did not discover any errors or criteria non-conformities. We did not make any notable changes from our documented RWT Test Plan in our testing methods or metrics.
