

Surgeon Cuts athenahealth EHR and Switches to Amazing Charts

Dr. Gerardo Carcamo says previous EHR was designed “by admins for admins”

Challenge: Working with an inefficient EHR system

Expensive	▶	<i>“There was a large fee for interfaces, and the percentage for billing was very high.”</i>
Limited customization	▶	<i>“I was told athenaClinicals was customizable, but I quickly found out it was highly limited.”</i>
Stressful workflow	▶	<i>“My staff hated the basic functionality and workflow of athenaClinicals. Some of my staff quit because the EHR was so difficult and stressful.”</i>
Work-life imbalance	▶	<i>“Every night I was in the office until 9 pm, finishing open charts.”</i>

Solution: Amazing Charts EHR

Usable and efficient	▶	<i>“Because of its focus on usability, I’m able to see more patients in a day with Amazing Charts.”</i>
Highly integrated	▶	<i>“Amazing Charts makes it easy to grab charts from hospitals and upload them into patient records.”</i>
Customizable	▶	<i>“With Amazing Charts, my staff and I have complete control over what we can customize!”</i>
Healthy work-life balance	▶	<i>“I’m not in the office late at night anymore. I’m able to get home after the last patient is assisted.”</i>

Results

- ✓ Dr. Carcamo’s staff is happy with the efficient office workflow of Amazing Charts
- ✓ Customizable templates allow Dr. Carcamo to spend more time with patients
- ✓ Dr. Carcamo now gets home in time for dinner and spends more time with family
