

MOBILE CLINIC WITH AMAZING CHARTS EHR REDUCES CHRONIC DISEASE IN UNDERSERVED POPULATION

Dr. Lopez wants to help fix the broken healthcare system in America

Glenn Lopez, MD

CHALLENGE: BRINGING AFFORDABLE HEALTHCARE TO THE STREETS OF L.A.

- Going mobile without the internet → "I couldn't use a web-based system because the mobile clinic doesn't always have broadband reception. The software had to run on a simple laptop computer..."
- Keeping cost down → "It had to be inexpensive because I needed to spend most of my budget on equipping the clinic."
- Finding an intuitive EHR → "I wanted an intuitive EHR I could start using immediately without any formal training."

SOLUTION: AMAZING CHARTS EHR

- Easy to learn → "After watching someone use Amazing Charts to document a few patient encounters, I was able to use it to see a patient the next day."
- Risk free → "I was able to use a full-working version of the EHR software before purchasing."
- Affordable → "The very affordable price and user-friendliness of Amazing Charts enables me to provide low-cost medical services to people in desperate need of care."

RESULTS

- ✓ The affordability of Amazing Charts left enough money Dr. Lopez to purchase a 34-foot "fifth-wheel" trailer
- ✓ Customizable health maintenance alerts allow Dr. Lopez to easily track and treat chronic diseases
- ✓ The granular reports allow Dr. Lopez's funders to see how many people he is treating and with what conditions
