A Harris Healthcare Company

# ELECTRONIC HEALTH RECORDS FOR INDEPENDENT/PRIVATE PRACTICES

Built by a physician, for physicians. Amazing Charts was founded in 2001 by a practicing physician familiar with the challenges independent clinicians encounter on a daily basis. Since then, Amazing Charts consistently ranks as a top EHR for ease of use and remains an affordable option for private medical practices. Amazing Charts is focused on providing easy-to-use solutions so you can spend more time with your patients and less time with your computer.

*“ I love the fact that your whole chart is all on one screen. [Amazing Charts] is very easy to use, there’s no learning curve on it, and it was simple and straightforward.”*

– Wendy Gottlieb, MD

*“ Because of its focus on usability, I’m able to see more patients in a day with Amazing Charts.”*

– Gerardo Carcamo, MD

## WHAT MAKES OUR EHR DIFFERENT?

### Designed by a Doctor

Unlike other EHRs, the Amazing Charts software was originally built (and coded) by a physician. Who else can say that? If your EHR is cumbersome and not intuitive to use, there’s a reason why!

### Easy to Use

Amazing Charts is designed to minimize clicks and present more information on one screen, which saves you time. We challenge you to compare how many clicks it takes to complete a chart in your current EHR!

### Affordable Option with a Real Free Trial

We understand “affordable” is a relative term, but when compared with other options for private practices, Amazing Charts provides strong value. It’s ranked high for overall satisfaction for that reason. We also offer a 28-day free trial so you can use the actual product in your practice.

**If you see 30 patients per day and it takes you 5 extra minutes to chart a routine patient visit using your current EHR, that’s 2+ hours per day, or 10+ hours per week, wasted on charting. This adds up over time and costs your practice revenue.**

**JOIN OUR NATIONWIDE COMMUNITY OF 15,000+ PHYSICIANS AND 8,000 PRACTICES**

We’re a part of the Harris Healthcare family, providing significant financial stability. Harris practices the “Family is Forever” policy, meaning it never sells the companies it acquires. You never need to worry about a new owner taking over your software. This also means that clients can take advantage of the “Software for Life” philosophy. Regardless of which solution clients choose, they receive the same level of service, support, and long-term technology protection, forever.

## FEATURES & BENEFITS

### Messaging

With our intra-messaging system, charts are accessible and editable within any inbox to any users with appropriate access.

### e-Prescribing

Amazing Charts contains a robust and built-in e-Prescribing module. Powered by NewCrop, a SureScripts Certified Solution.

### Scheduling

Book, reschedule and even document missed and no-show appointments. Set appointment types and duration and quickly rebook appointments.

### Charting

Easy, one click access to chart summaries, lab results, referral summaries and past encounters summaries. No more re-documenting the same information!

### Templates

Amazing Charts templates are designed to both work easily and to minimize the risk that your notes all end up being essentially the same.

### Patient Portal

Work with your patients electronically to exchange messages, share visit summaries, test results and educational materials.

### Maintenance & Support

Telephone, email, chat and remote access to US-based support personnel. Receive regular program and database updates to improve your EHR usability.

### Reporting

Our user-friendly reporting tool provides common preset queries as well as the ability to build your own complex queries in an easy, step-by-step process.

### Billing

When you sign a note in Amazing Charts, an electronic superbill is automatically generated and stored for billing. We also have Practice Management and Billing Service Solutions.

## WE HAVE ADDITIONAL TOOLS YOUR PRIVATE PRACTICE NEEDS TO THRIVE

- +** **Practice Management:** An interactive dashboard allows you to stay on top of all of your claims and payments. Automated eligibility and claim status checks help improve reimbursements. Appointment reminders and patient payment options improve patient satisfaction.
- +** **Population Health:** Track and report on Clinical Quality Measures. Identify care gaps and fill appointments. Better manage care of your patient panel.
- +** **Remote Care:** Improve patient care and overall satisfaction using telehealth. Enhance care coordination with virtual preventative care tools for patients with chronic conditions.
- +** **We have additional EHR options available if they are a better fit for your practice. Simply ask to learn more!**
