

PRACTICE MANAGEMENT TOOL FOR INDEPENDENT/PRIVATE PRACTICES

CareTracker Practice Management allows you to efficiently run your practice and ensure you aren't leaving dollars on the table. By quickly identifying coding inconsistencies prior to claims submission, electronically confirming eligibility and claim status, and easily identifying unpaid claims, you can feel confident you'll maximize reimbursement for the work you do. There's even a dashboard to track your progress and alert you to pressing items – leaving you more time to concentrate on your patients.

“
It was very challenging with our old system. We didn't have a lot of control over our claims...and we basically felt like we were constantly looking for and finding problems that we didn't know about.

“
We like all the control we have over all of our claims and that we get to see everything, right down from a denial to the EOBs.”

– Lauren O'Brien, Billing Manager, New England OB/GYN

WHY CHOOSE CARETRACKER PM?

Maximize Reimbursement

Review claims before submission with a rules-based claim scrubber to improve reimbursement rates, identify unbilled items, support provider compliance, and decrease accounts receivable cycles.

Know More at Check-in (and Beyond)

Quickly determine your patient's financial responsibility when they arrive by checking eligibility in seconds and creating easy-to-read benefits statements. Receive smart alerts when patient data issues occur that require your attention.

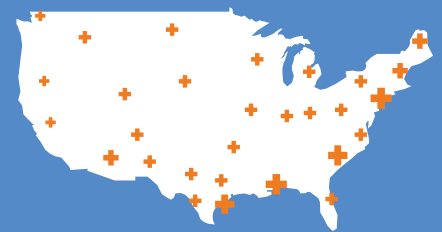

Gain Visibility into Accuracy and Progress

Review claims before submission with a rules-based claim scrubber to improve reimbursement rates, identify unbilled items, support provider compliance, and decrease accounts receivable cycles.

We're a part of the Harris Healthcare family, providing significant financial stability. Harris practices the "Family is Forever" policy, meaning it never sells the companies it acquires. You never need to worry about a new owner taking over your software. This also means that clients can take advantage of the "Software for Life" philosophy. Regardless of which solution clients choose, they receive the same level of service, support, and long-term technology protection, forever.

FEATURES & BENEFITS

View Unpaid Claims

With the ability to easily view unpaid claims, you can ensure they are worked promptly and issues are resolved before they become problems.

Claims Manager

Review claims before submission to maximize revenue potential by reducing denials.

Integrated Clearinghouse

With our Secure Connect Clearinghouse, we can provide a high-level of support and respond quickly to payer changes.

Intelligent Dashboards

Intelligent technology provides interactive role-based dashboards that automatically prioritizes work lists for all areas of your office.

Reporting

Get a quick, high level view of your practice finances and identify issues you can resolve to avoid reimbursement delays.

US-Based Support

Access our support team via phone, email, or chat, who can utilize remote access to identify and resolve issues quickly.

Claim Status

Automatically check claims status for improvement in reimbursements.

Patient Payments

Let patients pay outstanding balances online with Quick Pay

Payment Posting

Posting insurance payments is simplified and streamlined, saving time and effort.

DID YOU KNOW WE HAVE ADDITIONAL TOOLS YOUR PRIVATE PRACTICE NEEDS TO THRIVE?

- +** **Electronic Health Records:** We have a variety of easy-to-use and affordable EHR options tailored to the needs of independent physicians and practices.
- +** **Population Health:** Track and report on Clinical Quality Measures. Identify care gaps and fill appointments. Better manage care of your patient panel.
- +** **Remote Care:** Improve patient care and overall satisfaction using telehealth. Enhance care coordination with virtual preventative care tools for patients with chronic conditions.
